DETAILED ACTION

1. This Office action is responsive to applicant's response to the election of species requirement dated September 8, 2005. The election of species requirement is now withdrawn since formula (1) has been found allowable as a host material of a device according to independent claim 1.

Claim Objections

2. Claims 27 and 28 are objected to because of the following informalities:

It is suggested that "OLED device" in each of claims 27 and 28 be changed to "electroluminescent device" for consistency with parent claim 1. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 23 sets for "formula 1(a)" with regard to claim 1. Claim 1 only recites "formula (1)" and accordingly, claim 23 is considered to be indefinite. Correction and/or clarification is required.

Art Unit: 1774

Allowable Subject Matter

6. Claims 1-22, 24-26, and 29 are allowed. The closest prior art is considered to be WO 03/007658. While the document teaches a host material comprising a phenyl ring with ortho substitution as a host material for an EL device, WO '658 fails to teach or to render obvious a host material according to specific formula (1) according to claim 1.
